Technical Skills

Next.js, React, JavaScript, TypeScript, Tailwind, MongoDB, Mongoose, Zustand, Express, Node.js, Next-Auth, Stripe, Zod, Prisma, Postgres, Git, GitHub, Shadcn, Material UI

Relevant Experience / Projects

Front-end Software Developer | **Apostolic Community** | Next.js 14, Tailwind CSS, Google maps API, RadixUI

- Led collaborative efforts with Apostolic Community to strategize and develop a custom website tailored to their objectives, ensuring alignment with the community's identity and values.
- Delivered a professional website that embodies the essence of the community, reflecting its unique identity and values.

Front-end Software Developer | **CarRent** | *Car renting app* | Next.js, Tailwind

- Developed a dynamic web application based on meticulous Figma designs, facilitating seamless collaboration between frontend and backend teams for efficient development and deployment.
- Utilized Next.js 13 and Tailwind CSS to implement best coding practices, creating reusable components and ensuring a responsive design for enhanced user interaction.

Full-stack Software Developer | **Hipnode** | *Social media app* | React Vite, Express, MySql & Prisma

- Developed a social media application from an extensive Figma design
- Implemented an upload middleware on the backend
- Created Podcasts and Meetups Page. Setup UI and backend routes to display dynamic data from the database

Front-end Software Developer | **Jobit** | *Job search application* | React, Redux toolkit, MUI

- Collaborated with a cross-functional team to translate high-fidelity Figma designs into a user-friendly interface, leveraging Redux Toolkit to efficiently manage the app's main state.
- Engineered a fully responsive website, optimizing user experience across diverse devices including desktops, tablets, and mobile phones

Full-stack Software Developer | **Promptopia** | *AI prompt sharing application* | Nextjs, Next-auth, Javascript, Mongoose, MongoDb

- Implemented CRUD functionality utilizing efficient app directory and API folders, streamlining data management processes for improved performance and scalability.
- Enhanced user experience and security measures by integrating sign-in functionality via Google providers, ensuring seamless authentication and user data protection.

Front-end Software Developer | **Filmpire** | *Movie information app* | React, Material UI, Redux toolkit

- Developed a user-friendly application enabling seamless movie searches via the TMDB API, integrating essential functionalities such as search, favorite, and watchlist features.
- Ensured optimal user engagement by adding features that enhance movie discovery and interaction, for great UX.

Prior Experience

Tire Technician | Sam's Club   2020–2022

- Oversaw tire and hardware inventory, conducting regular assessments and adhering to manufacturer specifications for tire dismounting, mounting, and repair.
- Supported team efforts by maintaining a clean, hazard-free shop environment and providing attentive customer service, promptly addressing concerns and escalating significant issues to supervisors.

Manager | McDonalds   2017- 2020

- Strategized, coordinated, and engaged with staff for operational effectiveness, client gratification
- Achieved promotion to manager within a month for showing adaptability, teamwork, communication and a growth mindset.

Education

Software Engineering Program | JSM Masterclass Experience   2023
General Studies | Truckee Meadows Community College   2018-2020
Pursued B.S. Business | Purdue University   2020-2021
